

# Review of: "Perspectives on the Immune System in Sepsis"

Li Wang

**Potential competing interests:** The author(s) declared that no potential competing interests exist.

It is a good review of alterations and mechanisms of immune system in sepsis. It is informative and will be helpful in the evaluation of immune status and treatment of specific individuals with sepsis. Whereas, I think that this manuscript lacks a description of the role of intestinal immunity in sepsis and interventions of gut microbiota with diet or probiotics on intestinal immunity in sepsis. After all, most of the infections in sepsis resulted from the gut.
