

# Review of: "Is Indian Costus Effective Against the SARS-CoV-2 Virus?"

Vandana Daulatabad

Potential competing interests: No potential competing interests to declare.

This article represents a short, general description of the therapeutic effects of Indian Costus against the SARS-CoV-2 virus. The article has details of Indian Costus but needs to focus more on the mechanism of action on the SARS-CoV-2 virus. The author should also include the literature available and the incidence rate of patients benefited from this herbal product as an antiviral treatment. The article should also elaborate on the details of the search engine, sample size, and statistical significance of the product used as an antiviral agent.
