**Potential competing interests:** No potential competing interests to declare.

I have noted down the following text:

This article is a review of current literature on the use of fly ash in road construction. The conclusion section contains my findings and thoughts. Note that this article only collects literature and cannot be considered as independent research.

There are a few typographical errors that need to be corrected. On page 7, "ASHpalt" should be changed to "asphalt". On page 9, the subscripts in the chemical formula ( $\text{Na}_2\text{SiO}_3\text{:NaOH}$ ) should be highlighted. On page 11, the number 3 should be in the superscript for cubic meters ( $18.08 \text{ mg/m}^3$ ).

In the "Summary and Recommendations" chapter, it would be better to include more of the authors' own opinions and thoughts. Concrete examples of implementation could be included, rather than just theoretical possibilities and research results.

Sometimes the grammar is a little bit strange, and the use of some words seems to be foreign.
