# SNR1

National Cancer Institute

## Source

National Cancer Institute. *SNR1*. NCI Thesaurus. Code C19856.

The *Drosophila* gene Snf5-related 1 (Snr1) encodes a non-specific RNA polymerase II transcription factor. It interacts genetically with *brm*, *trx*, and *osa*. Similar sequences have been identified in *Caenorhabditis elegans*, *Homo sapiens*, *Saccharomyces cerevisiae*, and *Tetraodon fluviatilis*. (from FlyBase 0011715 and NCI)
