Dear Author,

I would like to thank the author/s for their effort.

The authors have spent considerable time looking at the role of universities for achieving sustainable Smart Cities in India. But there are some minor comments that need from authors to modify it to enhance the research:

In the Abstract: It is preferable if the author rewriting the abstract with more emphasis on the methodology because its not clear in current version of abstract.

In the Introduction: I prefer to expand the references in this area especially in Introduction with more updated references related to the topic.

By the end, I want to say that you did a great job and all this comments is to encourage the author to enhance the quality of paper.

Thank you for your efforts.

Best Wishes
