

Review of: "Challenges in identifying biomarkers for Smooth muscle tumors of uncertain malignant potential (STUMP)"

Apiwat Aue-aungkul

Potential competing interests: No potential competing interests to declare.

1. Part of literature search should be added.
2. How about Stanford criteria?
3. Criteria for diagnosed uterine smooth muscle tumor should be displayed as table.
4. Preoperative investigations for diagnosing uterine smooth muscle tumor, such as diffuse-weight imaging MRI and serum LDH, should be described.
