

Review of: "Perception of Biodiversity versus Connection to Nature: Which Can Influence Wildlife Product Consumption in Vietnam?"

Mohammad Younus Bhat

Potential competing interests: No potential competing interests to declare.

1. Abstract should include : Background, Objective, Method, Result, Implications.
2. Introduction section needs improvements. Please include the following points in the introduction section : a) research aim and research objectives, b) reasoning for the focus of the paper and assumptions of the paper(Theory assumptions), c) research question(s), d) research and epistemological approach and e) originality of the paper and contribution to knowledge. Reorganize on the suggested flow.
3. Review of literature can be divided into different subsections as it contains different strands of literature. Further, They should explain how this study will contribute towards this literature. and what gaps they have identified and addressed in their study.
4. Logistic Regression Method is not explained in the methododlogy section. In its current form the flow of the design is weak. Therefore, it should be improved.
5. Descriptive statistics of the sample is missing.
6. Mediating analyses is okay but needs justification.
7. Authors must address global audiiance and not only the local one.

Best of Luck
