

Peer Review

Review of: "Calibrating DRAMPower Model: A Runtime Perspective from Real-System HPC Measurements"

Dr. Shahid Naseem¹

1. Information Sciences, University of Education, Pakistan

1. Authors used some abbreviations in the abstract section but didn't give the full form of these abbreviations.
2. Accuracy of the proposed technique is missing in the abstract section.
3. Sub-sections of Section II must be cited properly.
4. The sequence of the references in Section II is not accurate.
5. Equations should be numbered.
6. The detail of the equations is missing.
7. The number of figures is missing in the text format.
8. Limitations of the research work are missing in the discussion section.
9. Most of the references are before 2020; references must be between 2020-2024.
10. The number of references is too short. It must be between 25-30 for this kind of research paper.
