

# Review of: "Research on the uncertainty of low-carbon environmental governance system and its impact on the dual goals of carbon emission reduction"

Min Wang

Potential competing interests: No potential competing interests to declare.

This paper analyzed the impact of low carbon governance on carbon emission reduction from a new perspective. Some interesting results have been shown in the paper. Some comments are given below for the authors to improve the paper.

1. Construct a stronger theoretical framework to engage with the most recent literature.
2. Engage findings and discussions with the theoretical argument/framework and most recent literature.
3. Better articulate the study's scholarly contributions and originality by engaging existing literature.
4. The authors are suggested to include the discussions on the possible uncertainties of the findings due to the selection of the proxy variables in the analysis.
