

Review of: "Patient Positivity through Photos- What NHS Patients Really Think of Digital Healthcare"

Silvia Bressy

Potential competing interests: The author(s) declared that no potential competing interests exist.

Very interesting article and innovative point of view: it is good to know patient's perception. It is clear patients have undoubtedly appreciated VC during pandemic. It would be also interesting to know if you have met negative aspects (any complains from them or for example requests for home visits due to inadequacy of VC in particular situations). It is good to mention the positive impact on environment as you did, and this could be an incentive to use VC regularly in primary care in the future.
