Potential competing interests: No potential competing interests to declare.

Here are some comments that could be useful for the manuscript titled "Impact of Environmental Education on the Knowledge and Attitude of University of Benin Students towards Waste Segregation":

Title: The title is clear and informative. However, it could be more engaging if it directly addresses the key findings or implications of the study. For example, "Transforming Attitudes towards Waste Segregation: The Role of Environmental Education among University of Benin Students".

Abstract: Ensure that the abstract succinctly summarizes the key aspects of the study including the purpose, methods, key findings, and implications. It should be able to stand alone, providing a complete picture of what the study is about and why it matters.

Introduction: The introduction should provide a clear background of the issue of waste segregation and the role of environmental education. It should also clearly state the objectives of the study and the research questions.

Literature Review: The literature review should be comprehensive, covering key theories and prior studies on environmental education and waste segregation. It should also identify gaps in the existing literature that the current study aims to fill.

Methodology: The methodology section should provide detailed information about the sample, data collection methods, and data analysis procedures. It should also discuss any limitations of the chosen methods.

Results: The results should be clearly presented, with the use of tables or figures where appropriate. The text should highlight the key findings and not just repeat the information in the tables/figures.

Discussion: The discussion should interpret the results in light of the research questions and the literature review. It should discuss whether the findings support or contradict previous studies.

Conclusion: The conclusion should summarize the key findings, discuss their implications, and suggest areas for future research. It could also discuss potential policy implications or practical applications of the findings.

Language and Style: The manuscript should be carefully proofread to correct any language errors. The writing style

should be clear and concise, avoiding jargon and overly complex sentences.
