Salmonella enterica subsp enterica

National Cancer Institute

Source

National Cancer Institute. *Salmonella enterica subsp enterica*. NCI Thesaurus. Code C86913.

A subspecies of aerobic, Gram negative, rod shaped bacteria assigned to the phylum Proteobacteria and the species *Salmonella enterica*. This subspecies does not produce acid from lactose, salicin, or galacturonate, will not hydrolyze gelatin, and exhibits no growth in the presence of KCN. *S. enterica subsp. enterica* is the causative agent of various types of salmonellosis.
