INTRODUCTION

1. I recommend an English review. Language editing for technical, academic writing.
2. Please revise how to cite other studies in a sentence. Some sentences in the paragraph do not have citations.

For example, in this paragraph:

"The relationship of quality of life and social support in a sample of 241 nurses working in Zanjan University of Medical Sciences in Iran was studied in the research of Shojaei et al [13]." → *A study from Iran in Zanjan University of Medical Sciences on [year] on 241 nurses found that there was a relationship between quality of life and social support [13].*

"Data were collected with the SF-36 and the McCain Marquin Social Interaction Questionnaire. The majority of nurses have moderate social support and poor quality of life. Social support had a significant effect on nurses' mental health. Higher levels of social support led to higher levels of general health, mental health, and happiness as dimensions of quality of life." → *Is this statement from the authors, previous studies, or Shojaei et al? If this statement is from Shojaei et al, it should be cited in the last sentence.*

Sample revised:

A study from Iran on [year] used the SF-36 and the McCain Marquin Social Interaction Questionnaire on 241 nurses at Zanjan University of Medical Sciences found that there was a relationship between quality of life and social support. The majority of nurses have moderate social support and poor quality of life. Social support had a significant effect on nurses' mental health. Higher levels of social support led to higher levels of general health, mental health, and happiness as dimensions of quality of life.

METHODS

1. Please write when this study occurred.
2. How much was the total population from the 14 hospitals that were used in this study?
3. How did the researchers reach the population sample and collect the data from respondents? Please mention the sample technique used in this study.

RESULTS

1. Please add the axis titles in Graphs 1-3. Please add units in each axis title. Is it used percentage (%) or frequency?
Please write clearly.
2. The total number of tables in this study is 13, but the table titles from 6-12 are missing.
3. Please make sure that you follow the manuscript submission guidelines carefully.

DISCUSSION

1. The current discussion section appears to be deficient in terms of word count when compared to the introduction. In order to enhance the comprehensiveness of the document, it is recommended to add more information to the discussion section. By doing so, it will provide a more in-depth analysis of the subject matter.
