**Potential competing interests:** No potential competing interests to declare.

The article addresses a relevant topic, since the relationship between religion and sexual diversity is an important one, and many LGBTQ people suffer from being unadapted to their religious communities. In terms of global studies, I think the search word "cult" may be insufficient as a search keyword, since in many countries other terms fit better to the addressed question, such as "religion," "spirituality." For a USA review, the word "cult" would seem fine to me.
