**Potential competing interests:** No potential competing interests to declare.

The result is:

1. The manuscript has been well written and meets scientific requirements.
2. The rationality explained in the introduction is good.
3. The research method is good, the analysis technique is correct.
4. The manuscript is scientifically acceptable and its novelty must be written explicitly in the form of a proposition.
5. The results and discussion are complete and quite in-depth.
6. The author has presented valid and reliable data.
7. The text can be interpreted and understood as a whole.
8. Conclusions have been presented consistently with the evidence and arguments presented.
9. I declare that I support this manuscript for publication.
