Potential competing interests: No potential competing interests to declare.

Authors have given the script in a simple and good way. The below points could be considered to enhance the script to attract more audience.

1. In the introduction part, kindly incorporate the Sustainable Development Goals with the theme of the discussed work.
2. Further, kindly emphasis about the importance of the wastewater treatment and recyclability of the same through highlighting state of art techniques reported.
3. In each sub division, it would be better to provide the recently published results.
4. Role of Amyloid membranes should be discussed in wastewater treatment process.
5. Interesting and appropriate figures will capture and provide ideas for the readers. Especially redraw the Figure 3.
6. Also, it is better to discuss deeply on the major challenges in wastewater treatment and future solutions.
7. Rewrite the conclusion part to express the clear idea of the script and its usefulness for the researchers working in this field.
8. Check the entire script for language correction.
