

Review of: "Skilling Up for Tomorrow's Cities: The Workforce of Smart Cities"

Maya Ivanova

Potential competing interests: No potential competing interests to declare.

The topic is very large and rich; therefore, I am surprised by the very limited range of literature. Moreover, some sections (the groups of occupational profiles) definitely look like they were AI-written - without any particular details, quite generic, and not supported by any references.

I would recommend a major revision with more focus, not relying on AI only, and citing relevant and contemporary papers.
