

Review of: "Crossing between Conceptual Metaphor Theory and Text World Theory"

Alina Buzatu

Potential competing interests: No potential competing interests to declare.

This paper tries to accommodate the main conceptual principles from two theoretical systems -i.e. Conceptual Metaphor Theory and Text World Theory - and to apply them to political discourse.

The paper is interesting and relevant: the conceptual hypotheses are solid, the demonstration is well conducted. My recommendation for the author would be to illustrate her theoretical ideas with a more diverse (and complex) corpus of examples.
