Congratulations for this important topic. I hope that the research will be accepted and published after making the amendments that we suggest to the researcher:

- 1- The researcher stated that the sample size in the summary was 340 companies, while he mentioned in the data collection tools section that the sample was 450 project owners.
- 2- The adoption of the questionnaire on economic topics represents a weakness in the study, which suggests that the standards adopted by the researcher be mentioned in the questionnaire questions.
