Hyponatremic Mineralocorticoid Resistance due to Mineralocorticoid Receptor Defect

National Cancer Institute

Source

National Cancer Institute. *Hyponatremic Mineralocorticoid Resistance due to Mineralocorticoid Receptor Defect*. NCI Thesaurus. Code C126810.

An autosomal dominant condition presenting with hyponatremia and hyperkalemia, mimicking low concentrations of aldosterone, associated with loss-of-function mutation(s) in the NR3C2 gene, encoding the mineralocorticoid receptor.
