Glycogen Storage Disease Type Ib

National Cancer Institute

Source

National Cancer Institute. *Glycogen Storage Disease Type Ib*. NCI Thesaurus. Code C122661.

Glycogen storage disease type I that is caused by mutations in the SLC37A4 gene. It is characterized by a deficiency of glucose-6-phosphate translocase. It may be associated with neutropenia resulting in recurrent bacterial infections, inflammatory bowel disease, gingivitis, periodontal disease, and mouth ulcers.
