Potential competing interests: No potential competing interests to declare.

I would like to congratulate you on the extensive, updated, and purposeful work you have carried out. It was my pleasure to read it. It presents a vast literature, updated and well-referenced, organized listing of the proximal and formal causes of the analyzed construct. You could have included cross-cultural studies to add to the theoretical proposals referenced in a way to strengthen your arguments. Furthermore, I liked that this paper has been concluded in a purposeful and realistic way.
