Disintegrin and Metalloproteinase Domain-Containing Protein 12

National Cancer Institute

Source

National Cancer Institute. *Disintegrin and Metalloproteinase Domain-Containing Protein 12*. NCI Thesaurus. Code C96039.

Disintegrin and metalloproteinase domain-containing protein 12 (909 aa, ~100 kDa) is encoded by the human ADAM12 gene. This protein plays a role in proteolysis, signaling and cell adhesion.
