Potential competing interests: No potential competing interests to declare.

The article is fairly well written. However, it has weaknesses which the author(s) has/have to work on. Weaknesses include:

1. Missing research methodology: this makes it difficult for the reader to understand how the data was collected and the types of data collected.
2. First section has no heading, e.g., Introduction.
3. The author should avoid the use of "I."
4. The discussion from paragraph 8 under "from customs to a customary legal system" should have a separate heading or subheading since it is about history.
