Thank you for entrusting me with the role of reviewer. I've thoroughly examined the manuscript and find it to be promising, though there are areas where refinement is needed.

Below are my suggestions:

1. Clarify abbreviations such as SGH upon first use and ensure consistency throughout the manuscript.
2. Specify the total Triple-Negative Breast Cancer (TNBC) datasets analyzed. While SGH data is mentioned, provide details regarding the inclusion number of data from other local studies as mentioned.
3. Can you provide specific examples of where abbreviations like SGH are inconsistently used, to help the authors understand exactly where corrections are needed?
4. Regarding the statement on parity, could you suggest alternative phrasing or clarify the aspects that need enhanced clarity?

Thank you.

Mastura Mular.
