

# Review of: "COVID-19 Crisis: Exploring Challenges, Opportunities, and Cautions"

Murthy Chavali<sup>1</sup>

<sup>1</sup> MIT-WPU

**Potential competing interests:** No potential competing interests to declare.

Authors have studied the pandemic's impact on public health, the economy, education, and social dynamics. They also conducted a survey-based study to explore the cyclical nature of pandemics using a Neutrosophic logic-based classification, revealing intriguing insights into their recurrence patterns, potentially occurring approximately every century.

Such reviews are necessary.

Figure 1 must be altered for clarity. Legend and picture - are they with permissions, etc.?

Add 1-2 tables on what you wish to convey.

R&D must be elaborated and discussed upon.

Extend conclusions.

Increase references as this is a review.

Overall, a well-organized and readable article; however, the methodology and aim are not clear for readers.

Accept it with minor mandatory changes.
