Thank you for this review of the differences between quality improvement and research. It was generally a good read. I have a couple of suggestions and questions.

1. It will be useful to clearly state what is already known on this topic, what your review adds and how this might affect research, practice, and policies.
2. How does this review differ specifically from Bass & Maloy (2020)? Based on my readings, Bass & Maloy (2020) may have already explored most of the topics that you discussed in your review. It will be beneficial to catch the reader's eye on the differences or new information proposed by your review.
