# Antibody-drug Conjugate ABBV-011

National Cancer Institute

## Source

National Cancer Institute. *Antibody-drug Conjugate ABBV-011*. NCI Thesaurus. Code C161599.

An antibody-drug conjugate (ADC) composed of a monoclonal antibody directed against an as of yet undisclosed tumor-associated antigen (TAA) linked to an undisclosed cytotoxic agent, with potential antineoplastic activity. Upon intravenous administration, the monoclonal antibody moiety of ABBV-011 targets and binds to the TAA expressed on tumor cells. Upon binding and internalization, the cytotoxic agent is released and kills tumor cells expressing this particular TAA through an as of yet undisclosed mechanism.
