Review of a manuscript "***Spatio-Temporal Analysis of Precipitation Patterns in Xinjiang Using TRMM Data and Spatial Interpolation Methods: A Comparative Study***" by Zhang *et al.*

- 1- The general idea of the article is not innovative but remains acceptable at the regional level.
- 2- The introduction is very superficial and does not appropriately contextualize the subject.
- 3- There is a repetition of ideas throughout the article.
- 4- The figure captions need to be in English for better understanding.
- 5- There are two figures with the same numbering (Fig 3).
- 6- Title 3.1.1 is missing the letter "C".
- 7- More references should be added to explain and support the choice of these four interpolation methods.
- 8- A discussion section needs to be added to consolidate the work.

Good luck with your work!
