Potential competing interests: No potential competing interests to declare.

The article provides an insightful examination of smart city designs, skillfully articulating the complexities and innovations inherent in urban development. However, a notable addition could exist in its discussion. There's an urgent need to delve deeper into the unintended consequences of improper design, especially transportation accidents. This oversight isn't just a matter of engineering missteps—it can be equated to urban crime in its impact on citizens' lives and trust in smart city infrastructure. Such inclusion would provide a more comprehensive perspective on the challenges and responsibilities of creating truly safe and efficient smart cities.
