Potential competing interests: No potential competing interests to declare.

Generally, the manuscript needs major revisions. The comments are given below:

1. What are the availability and environmental implications of the materials used in this study?
2. The abstract of the manuscript should be revised.
3. In the introduction, some sentences need to be revised.
1. The introduction section does not explain the current situation of the content of the manuscript. Kindly revise;
2. Equations must be revised and written in the best way and cited.
3. What gaps did the authors identify? The authors should create a table, compare, and indicate the research gap;
4. The data in the figure is bulky and lacks logical order.
5. In the conclusion, the author should revise and explain the findings of the results of the manuscript and revise.
7. The author should check the language of the manuscript because there are many grammatical mistakes.
