The first review of a Manuscript entitled" Socioeconomic Impacts of Hybrid Pico Hydro-Solar Generation System Implementation in Sitio Singawan, Barangay Umiray, Municipality of Dingalan, Aurora, Philipp "

Article Type: Original Research Paper

During the first review of the paper, my general and main comments are as follows:

1. There are more and more errors in the standard of English (and other typo errors/mistakes), and then the authors should be proofread the paper carefully.
2. Very important note, remove all pronouns from the paper.
3. The abstract section should contain more and more results and must be shortened.
4. Due the repetitive abbreviations inside the paper, I propose to add a table called The Nomenclature before the introduction section.
5. I noticed that the authors citation to the journal is little, I recommend making a citation of the journal at least one-third of the total references.
6. The discussion section is very short compared to the obtained results. Please go through it and add more comments and interpretations.
7. Please clearly mention the novelty of this work in the main parts of the article (introduction, method, results, and conclusion section).
8. What is the technical specification of the fuel cell and PV cells used?
9. Can this study apply to other sites and locations?
10. All figures must be cleared (enlarge) and improved especially Figs. 10, 12 and 13.
11. The authors must update the references to 2023 and 2024.
12. The whole paper must rewrite again.
