The author should be more concerned about these comments.

1. In the abstract, the author should summarize the methodology used in the research.

2. In the introduction, the author should provide a strong contribution to this research.

3. In the analysis of the latest research and publications, this section requires in-text citations to confirm that the author surveyed the latest research.

4. The theoretical part is sufficient, but the research process and the proposed method are required.

5. Please provide the discussion section.

6. The conclusion section should be concise and supported by the experimental results. The future work should be presented in this section.

7. More up-to-date references are required.
