Potential competing interests: No potential competing interests to declare.

This is a brilliant piece of work. This is a very well-structured paper with excellent vocabulary and analysis. That's why I have very few comments to add.

Primarily, I feel that the abstract could be more extended and comprehensive.

In addition to that, there is no reference to methodology within the Introduction.

The unit Regression Result could be ranked as 4.3, not 4.4.

Respectively could be ranked the Discussion and Conclusion units.

The Conclusion section is quite small. It seems that 1-2 paragraphs are to be added to the first one.

Very few references for such a research.
