Review of: "Enhancing Food Type Recognition: A Comprehensive Study on Sequential Convolutional Neural Networks for Image Classification Accuracy"

V. Gokula Krishnan[1]

1 Saveetha University

Author must focus on the following points:

1. The abstract should succinctly summarize the key findings and contributions of the paper. Consider revising the abstract to accurately reflect the content of the paper.

2. The introduction needs to clearly state the research question and objectives.

3. The literature review could be more comprehensive and include recent relevant studies. Discuss how your work contributes to or differs from existing research in the field.

4. Please replace all figures with good-quality and high-resolution images such that the text inside the figures should be clearly visible to read.

5. Include more information on data preprocessing techniques and the rationale behind them.

6. Provide more details on the methodology and experimental setup for better reproducibility.

7. Discuss the significance of your findings and relate them back to the research question.

8. Clearly articulate the novel contributions of your work to the existing body of knowledge. Explain how your research fills a gap in the current literature and advances the field.

9. Provide a more detailed interpretation of the results in the context of existing literature. Discuss the significance of observed trends and variations, connecting them to the research question.

10. Provide additional technical details on novel algorithms, models, or techniques introduced in the paper.
