Hi, first of all, this is a very interesting paper that is suppose to communicate on the methods with the usage of generative AI tool on the development and application use to preserve tangible culture heritage. However, the write ups can be more visible and understandable on the methods as its not clearly justified. I have inserted my suggestion and comments in the shared word document ([click here to see the document](#)). I hope my inputs will further help to clarify the visibility of the paper to the readers. In addition, journal references to be included to increase the empirical studies of your article.
