Herba Scutellaria Barbata

National Cancer Institute

Source

National Cancer Institute. *Herba Scutellaria Barbata*. NCI Thesaurus. Code C2661.

A Chinese herb isolated from the plant *Scutellaria barbata* D. Don (Lamiaceae) with potential antineoplastic activity. Containing the antioxidant flavone scutellarin, herba *Scutellaria barbata* has been shown to induce apoptosis of ovarian and breast tumor cells in vitro.
