

Review of: "Malaria Vector Control in the Electronic Malaria Surveillance Information System (E-SISMAL)"

Divya Deodhar

Potential competing interests: No potential competing interests to declare.

1. Is the period included in the study related to the higher prevalence of the vector?
2. Was the seasonality of the vector taken into consideration while planning the study?
3. In the absence of dedicated staff, was sufficient education given to the health care workers in the community?
4. Was the reporting of the cases clarified by 2 or more observers?
5. The processes involved are very subjective; could objective data be provided?
6. What were the educational activities involved in this study that could be authenticated for their usage in the study?
