

## Review of: "Gumbel's Extreme Value Distribution for Flood Frequency Analyses of Timis River"

Sajad Esmaielzadeh

Potential competing interests: No potential competing interests to declare.

Dear Editor,

The dear author of this paper uses Gumbel's distribution to express the frequency of floods for the Timis River. After a review, it can be published in the Qeios Journal.

- 1 The English language should be checked.
- 2 The authors should add new and related references from 2022 or 2023.
- 3 The innovation and results of the research are not clear and do not exist in the abstract.
- 4 The article is not in the journal template.
- 5 At the end of the introduction section, the novelty of the paper should be introduced after comparing the literature review.
- 6 Why has the Gumbel distribution been used?
- 7 There is no independent conclusion section in the paper.
- 8 Many paragraphs do not have references.
- 9 The novelty of the manuscript is not clearly described.
