**Potential competing interests:** No potential competing interests to declare.

1. The abstract's structure is incomplete and requires the inclusion of the research method and conclusion.
2. The mentioned theories about migration are not well developed, and some concepts such as agency are not well clarified.
3. Which section of the text is elucidated in image 1? (Is the image embedded in the right place?)
4. To highlight the importance of the article subject, it's best to use a stronger argument to convey the concepts and their relationship. This framework will be presented as a diagram at the end.
5. The article's purpose is unclear, whether it's a case study or basic research.
