Potential competing interests: No potential competing interests to declare.

The article is well-written and easy to understand; however, some points can be added for further improvements.

1. You may provide more detection and diagnosis techniques for HCC.
2. Give highlights and advantages of NGS over other techniques.
3. Provide a brief overview of the previous ALK inhibitor generations and their drawbacks, advantages.
4. More detailed literature reports about the ALK mechanism may be added.
5. Other futuristic approaches and combination therapies may be discussed for ALK-associated lung cancers.
