Review Report

I am pleased to make a review report for the manuscript **Qeios ID: NO1GIC** and **Topic: "Future Trends in Ground Improvement: A Review"**.

1. The abstract should clearly define the problem statement, region for analysis, data methodology, analysis technique, and results of the study. All the mentioned items are missed in the abstract.
2. The introduction section is very poor and needs conscious improvement. The gap of study, research contribution, and research questions is missing. A lot of hard work is required for improving the whole manuscript.
3. How did you analyze the environmental concerns in the study?
4. Follow the studies given below for a better understanding of the environmental concerns.
