Review of: "Grid-secluded Induction Generator with ANN and Interval Type-2 Fuzzy based Controller for Wind Power Generation with Smart Load Control"

Hasanain A.H. Al-Hilfi[1]

1 Curtin University of Technology

Potential competing interests: No potential competing interests to declare.

1- The titles of the sections paper in the end Iof introduction should be listed, for example, Proposed Generation .... scheme will be described in the section II, ...

And so on...

2- There is no literature review in the introduction.

II- proposed generation.....

3- Difined VAr before mention it.

4- You mentioned "Fig.2 (a) is the d-axis equivalent circuit whereas Fig.2 (b) is...." I think you meant Fig. 1, please, mention 7them clearly.

5- You mentioned "Now as we know, ANN is a computationa", please, remove "as we know" and please, define Type-2 Fuzzy technology in the introduction or after it.

6- "neural network. An artificial neuron is shown below in Fig.2", in this phrase, you meant Fig.3, right?

7- Eq (13), /z , Its location is not clear, is it in the position of the division denominator or something else?

8- "From (13), it is shown than the dimension is reduced which....", "than" here is "that" as I think. Please, recorrect it.

9- The author mentioned that "it can also incipient faults besides controlling loads.", what the author means by incipient faults? Please be more accurate.

10- The author mentioned that "Similar internet-of-things (IoT) based controllers are often used for load monitoring purposes", there is more explanations regarding IoT.

11- The author mentioned that "signals and its algorithm is shown." Where is shown, please mentioned that.

12- The table above Fig. 7, what is it?

13- The author mention that "The loads with incipient faults can be determined from the ON/OFF condition K of kth no. of load and corresponding to its fundamental current signal I." I cannot understood "no" means?

IV. Simulation and Experimental Results

14- The author doesn't mention anything about table (1). Please, what is table (1)

15- There are many grammar and language mistakes, please, reveal whole paper to recorrect these mistakes.
