I appreciate being able to review this article, as it falls within my line of work.

I think that as other reviewers have said, it tries to cover a very broad topic, which makes it difficult for the research to focus on a specific aspect. In addition, it is assumed that terms that are not defined are known. Understanding the conclusions is difficult.

I would like to provide a link to two studies of my work group in the line of study of mental health in extra-hospital professionals.

Soto-Cámara R, Navalpotro-Pascual S, Jiménez-Alegre JJ, García-Santa-Basilía N, Onrubia-Baticón H, Navalpotro-Pascual JM, Thuissard IJ, Fernández-Domínguez JJ, Matellán-Hernández MP, Pastor-Benito E, Polo-Portes CE, Cárda García RM, en representación del Grupo de Estudio IMPSYCOVID-19. Influencia de la incidencia acumulada de casos de COVID-19 en la salud mental de los profesionales extrahospitalarios españoles. *Revista de Medicina Clínica*. 2022; 11(8):2227. <https://doi.org/10.3390/jcm11082227>

Molina-Oliva M, Martín-Sánchez R, Pastor-Benito E, Soto-Cámara R, Cárda García RM, Thuissard IJ, Fernández-Domínguez JJ, Matellán-Hernández MP, Navalpotro-Pascual S, Morales-Sánchez A en nombre de el Grupo de Estudio IMPSYCOVID-19. Influencia del estado mental previo en los resultados psicológicos de los profesionales extrahospitalarios españoles durante la pandemia de COVID-19. *Revista Internacional de Investigación Ambiental y Salud Pública*. 2023; 20(4):3574. <https://doi.org/10.3390/ijerph20043574>
