

Review of: "[Case Report] Clear Cell Carcinoma of the Ovary with Disseminated Intravascular Coagulation and Haemoperitoneum with Tumour Perforation"

Soumyadeep Ghosh

Potential competing interests: No potential competing interests to declare.

Title: Perhaps "tumour rupture" would be more appropriate a term than "tumour perforation".

Case presentation:

1. First paragraph first line: Consider "A 34-year-old woman reported dysmenorrhoea four months before this presentation."
2. Second paragraph: Consider "The patient had no other apparent cause for intra abdominal bleeding." at the end of paragraph after mentioning falling blood pressure and dullness on percussion.
3. Second paragraph last line: Consider revision - "The lower abdomen was tender with dullness on percussion suspicious for ascites."
4. Fourth paragraph: Consider "An urgent laparotomy was planned, and whole blood/packed red blood cells, fresh frozen plasma, and platelets were transfused to stabilise the patient before surgery."

Thank you!
