Potential competing interests: No potential competing interests to declare.

1. Text grammar must be checked.
2. The article's title mentions the application of microwave imaging, but none of the results is for this application.
3. The literature articles are very old.
4. A comparative performance table should be prepared.
5. All abbreviations must be defined upon first use.
6. The introduction section needs to be rearranged.
7. The reflector design should be explained in detail.
8. Why Figure 13 was added, you should explain the logic.
9. You should improve the visual quality.
