Word Pairs Immediate

National Cancer Institute

Source

National Cancer Institute. *Word Pairs Immediate*. NCI Thesaurus. Code C120332.

A component of the Children's Memory Scale. A child is read a list of paired words and then asked to say the second word after being told the first. The list is presented three times in this fashion. After the third list/cued recall trial the child is asked to tell the examiner as many word pairs as they can with no cues.
