Dear colleague,

Congratulations on your work. Here are some suggestions:

- Who performed the procedure?
- Add more information about this patient. Drug history, family history including any relevant genetic information, and psychosocial history, race.
- Please ensure any images/figures/photos are suitably anonymized with no patient information or means of identifying the patient.
- Please add a Guarantor on the Author form, if you haven't already. The guarantor is that individual who accepts full responsibility for the work and/or the conduct of the study, had access to the data, and controlled the decision to publish.
