N-(5-tert-butyl-3-isoxazolyl)-N-(4-(4-pyridinyl)oxyphenyl) Urea

National Cancer Institute

Source

National Cancer Institute. *N-(5-tert-butyl-3-isoxazolyl)-N-(4-(4-pyridinyl)oxyphenyl) Urea*.
NCI Thesaurus. Code C44168.

An orally available isoxazole urea with potential anti-tumor activity. In preclinical trials, N-(5-tert-butyl-3-isoxazolyl)-N-(4-(4-pyridinyl)oxyphenyl)urea inhibited raf kinase, an enzyme capable of reversing the phenotype of ras-transformed cells and blocking tumor growth. (NCI)
