1. This is an interesting study, however the abstract lacks the sentence that speaks to the methodology that was used to obtain the data.
2. Rephrase your last sentence of the abstract, rather write a recommendation there following your findings.
3. Your conclusion needs to be strengthened. It reads as if you are analysing the study other than concluding on the findings. I would also suggest that you remove the last sentence on your conclusion as it does not fit there.
4. On your figures and tables, include year to your sources.
